

SUBJECT: Policy Letter 1-5, Safety

7. Radiation Safety. Warrior Brigade units have equipment that is maintained under the Radiation Safety Program. This program is outlined in JRTC and Fort Polk Supplement 1 to FORSCOM Regulation 385-1, FORSCOM Safety Program. Ensure safety officers are in compliance with this regulation and that leaders are aware of their specific requirements.
8. Off Duty Safety. Use the Save our Soldiers Program (FP Reg 385-7) to increase awareness of off duty safety. Make sure your soldiers have their chain of commands' telephone numbers and that they know to call 531-COPS for a free ride home in the event they have consumed too much alcohol. Enforce the use of designated drivers.
9. Safety Incentives. Commanders develop incentive programs. Coordinate with Brigade S1 if you want to reward soldiers who have performed exceptionally in the safety arena. I can present Certificates of Achievement for individuals and units.
10. My intent is to prevent accidents and preserve the fighting potential of our force. Leaders constantly emphasize safety and integrate effective safety measures into everything we do. We are responsible for our soldiers, on and off duty; this responsibility cannot be delegated. Stay on top of active safety practices in your units.
11. The chain of command will ensure all Soldiers are aware of this policy and that this is posted in the unit area.

“WARRIORS!”
